Minsk Institute of Management in January Ranking Web of Universities 2014

The new release of [Webometrics Ranking of World Universities](#), published 11 February, 2014 includes more than 22000 higher educational institutions. Aim of the Ranking is to motivate both institutions and scholars to have academic web presence, in order to display results of their scientific-methodological activity.

60 Belarusian websites were estimated in January 2014 world ranking of higher education institutions' websites. It should be mentioned that in general position of most Belarusian higher education institutions has improved compared with the July Ranking, in particular, Minsk Institute of Management improved its position by 2108 points.

This is already the fifth release of the ranking which includes Minsk Institute of Management. Website of Minsk Institute of Management holds high standing in the ranking among websites of Belarusian institutions of higher education. In January 2014 ranking website of the institute took **6231 place in the world** and **11th place in Belarus**.

[Methodology](#) of the ranking still includes the following indicator:

Activity (50%)

- **Presence** (1/3). The total number of webpages hosted in the main webdomain (including all the subdomains and directories) of the university as indexed by the largest commercial search engine [Google](#).
- **Openness** (1/3). The global effort to set up institutional research repositories is explicitly recognized in this indicator that takes into account the number of rich files (pdf, doc, docx, ppt) published in dedicated websites according to the academic search engine [Google Scholar](#).
- **Excellence** (1/3). The academic papers published in high impact international journals are playing a very important role in the ranking of Universities. Using simply the total number of papers can be misleading, so we are restricting the indicator to only those excellent publications, i.e. the university scientific output being part of the 10% most cited papers in their respective scientific fields. Although this is a measure of high quality output of research institutions, the data provider [Scimago group](#) supplied non-zero values for about 5154 universities.

Visibility (50%)

- **Impact**. The quality of the contents is evaluated by counting all the external inlinks that the University webdomain receives from third parties. The link visibility data is collected from the two most important providers of this information [Majestic SEO](#) and [ahrefs](#).

Website of Minsk Institute of Management takes **956 place in the world in terms of Openness indicator (second place among Belarusian HEIs)**, which indicates high assessment of the content of the [electronic library](#) of the institute and educational-methodological publications placed on the institute's website.

Place in the world	Changes in the world ranking since July 2013	Place in Belarus	University	Position
